

AVE-70-DIG (DG25i-5)

Specification Sheet

Overview

The digital DG25i series offers 0,5 % of span accuracy, while the laser welded stainless steel sensor and socket make this product suitable for use with a wide variety of pressure media in demanding industrial applications. This series is also available with enhanced accuracy of 0,25 % of span making it suitable for many test and measurement uses. IP67 ingress protection rating means the DG25i is suitable for hose directed water spray such as equipment wash down. Nine preprogrammed engineering units of measurement to read pressure in units applicable to the process or familiar to the technician using the gauge. The DG25i comes standard with many features such as: tare, min and max memory, programmable custom engineering units, and pressure ranges from -1 to 1600 bar.
